personnel file.***

- True or False**
To "prioritize" means to arrange things in order of importance.
- True or False**
Maslow's Hierarchy of Needs shows the need for self-esteem to be the most important priority for all humans.
- True or False**
Elimination is an example of a physical need.
- True or False**
Prioritizing safety means you prevent problems instead of just reacting to emergencies as they happen.
- Your client has an order for "Daily Weights." You cannot get to it before the end of your shift because another client had an emergency. You should:**
 - Try to remember to do it first thing the next day.
 - Let your supervisor know so the weight can be checked on the next shift.
 - Chart the previous day's weight —not much would have changed anyway.
 - Ignore the order, it's not a priority.
- True or False**
Taking vital signs is not really a priority. You should just do it whenever you have time to get to it.
- True or False**
When you work with the same clients every day, there is no need to get report or read the chart.
- True or False**
Making a "to do" list can help you feel more organized and productive.
- True or False**
It's best to deal with a difficult client last. That way you won't get behind.
- Fill in the Blanks**
Difficult clients (or family members) may be acting out as a way of gaining
_____.
