IN THE KNOW

Developing Top-Notch CNAs, One Inservice at a Time

A Risk Management Module:
All about Bed Bugs

Are you "In the Know" about bed bugs?
Circle the best choice. Then check your answers with your supervisor!

Which of the following is NOT a characteristic of a bed bug?

A. Able to fly
B. Has six legs
C. Brownish red
D. Feeds on blood

Bed bugs are attracted to a home or building because of:

A. The smell of garbage
B. The people living there
C. Pets
D. Electric lights

Scientists believe that bed bugs have come back to the U.S. because:

A. Of global warming.
B. The U.S. population has grown so much.
C. We no longer use the pesticide, DDT.
D. We use too many antibacterial products.

4. True or False

It is impossible for a clean and sanitary workplace to get infested with bed bugs.

5. True or False

Bloodstained sheets or dark spots on a mattress could be signs of bed bugs.

6. True or False

Bed bugs can't live in an unoccupied room since they need to feed on a human every night to survive.

7. True or False

Most bed bugs breed within six feet on a person's bed.

8. True or False

Bed bug bites can transmit serious diseases to humans.

9. True or False

Bed bugs can be killed by extreme temperatures—either very hot or very cold.

10. True or False

Using personal protective equipment may keep you from spreading bed bugs from one client's room to another (or to your own home).
